

LEVEL 2.0 BEGINNER ENGLISH ENHANCEMENT COURSE

(ONLINE LEARNING)

This fully online, self-study general English course is designed for those with minimal English and aims to provide students with basic language skills at beginner level.

Six topic-based units help students learn basic vocabulary by subject, with each unit divided into the separate language skills of reading, writing, listening, speaking, and vocabulary and grammar.

Each topic includes approximately 1.5 hours of teaching video containing exercises and activities, with each video lasting approximately 15 minutes. To be successful, you should actively work through each video, pausing the recordings at given points to undertake activities that reinforce the learning.

Learning to speak a language well involves learning to think in that language, which means practising what you learn. In particular, you should find time to practise your speaking skills with a study partner, family member or friend.
