

Micro-Credential Programme

BUSINESS SIMULATION

This programme focuses on computer-based simulation, where models are implemented as part of a computer programme that computes and records data on system behaviour. Students will learn to model business processes using visual languages, apply statistical distributions to probabilistic inputs, and develop stochastic simulation models.

They will use specialist software (e.g., SIMUL8) and gain the skills to transfer their knowledge to other software and contexts.

Students will receive a certificate upon completion of the programme.

Progression

- Master in Information Technology (Online Learning)

Duration and Fee

Duration: 7 weeks
Fee : RM3,226

Delivery Mode

- Online Learning

Assessment Mode

- Coursework
- Final Examination

Offered at

INTI International University
INTAKES: JAN, MAR, MAY, AUG & OCT
