

Professional Development Programme

DATA ANALYTICS

The Data Analytics programme covers the fundamental concepts and abilities required to analyse statistics, prepare data sets, summarise data, and build data visualisations.

This programme is suitable for entrepreneurs, managers, or those who require real data analysis skills to produce analytics and insights.

Students will receive an ICDL Certification upon passing the assessment.

Programme Outline

- Concepts and statistical analysis
- Data set preparation
- Data set summarisation
- Data visualisation

Objectives

- Understand the key concepts of data analytics in business
- Apply statistical analysis concepts to data sets
- Learn to import data into a spreadsheet and prepare it for analysis by carrying out cleansing and filtering
- Utilise pivot tables and pivot charts to summarise data sets
- Understand data visualisation tools and techniques, and know how to apply them when creating reports and dashboards
