

PRE-U

MAKE YOURSELF FUTURE READY

To make your mark at a world-class university

About INTI

One of the most respected and trusted names in Malaysia's private higher education, INTI International University & Colleges celebrates more than 30 years of empowering young minds with over 65,000 graduates to testify to the quality education it delivers. INTI provides access to the global resources, best practices, teaching methods, international faculty and learning management systems that are truly world class.

With a strong focus on innovative learning and the integration of technology into the classrooms, INTI emphasizes an education that is tailored to the needs of tomorrow's leaders.

INTI's Enrolment to Employment initiative is also instrumental in helping INTI students develop the skills, knowledge and capabilities as they become the game changers of the future. Our collaborations with Industry Partners have laid the foundation for our positive student outcomes in employability, and this is a reflection of the skills and capabilities our students are able to demonstrate.

ESTABLISH THE FOUNDATION OF YOUR FUTURE

THE GROUNDWORK FOR FUTURE SUCCESS BEGINS WITH INTI PRE-UNIVERSITY PROGRAMMES.

INTI PRE-UNIVERSITY - THE FIRST STEP TO SUCCESS

Standing out from the crowd in a highly competitive job market requires you to have a decisive edge. The INTI Pre-University course not only prepares you for tertiary studies at the world's best academic institutions, it also empowers you with a holistic foundation of both soft skills and knowledge to succeed later in life. If you have your sights set on studying in a world-class university, the INTI Pre-University programme is the first step to success.

WORLD-CLASS SUBJECT MATTER EXPERTS

The INTI Pre-University programme is staffed by some of the world's best lecturers as well as a team of respected Subject Matter Experts (SME). Each SME is an authority in their own field, offering specialised, world-class expertise in an important subject, business area or technical field, allowing INTI students exclusive access to their expert knowledge. INTI's SMEs also act to ensure that the courses offered at the INTI Pre-University programme are kept relevant and to the world's highest standards. The results speak for themselves. Over the years, INTI has produced Cambridge A Level students who have achieved Outstanding Cambridge Learner Awards. Recipients of the award are recognised as the world's best scoring students, with INTI Pre-University students earning Top in the World and Top in Malaysia for Biology, Business, Economics, Law, Mathematics and Physics.

For SACE International, INTI Pre-University students were awarded the Highest SACE International Subject Achiever Award and SACE Merit Certificates for Accounting, Biology, Chemistry, English as Second Language Studies, Mathematical Studies, Research Project and Physics.

According to New South Wales Higher School Certificate's (NSW HSC) 20 years of track record excellence, more than 45% of the students scored UAI/ATAR 80.00 and above where half of them scored UAI/ATAR 90.00 and above.

MEET SOME OF INTI'S SUBJECT MATTER EXPERTS.

WHY PRE-U AT INTI

GE Leaders Of Tomorrow

INTI UNIVERSITY PLACEMENT SERVICES TEAM

The success story of every winner has a team backing them up every step of the way. To get you embarked on the road to success, INTI has a dedicated University Placement Services team that helps you take the guesswork out of applying for university.

Applying to a university set in a foreign country can be a highly stressful process with a host of rules and regulations to comply with and multiple procedures to undertake during the application process. The experienced University Placement Services team helps to make the whole process a more pleasant and less stressful experience. As a complimentary service for INTI students, the team can help with the following challenges facing students and offer the following services:

- Assistance with the application process for scholarships and university placements along with preliminary budgeting for living abroad
- Professional advice on selecting the best academic institution to fit a student's needs
- Advice to craft an effective study plan to meet the English entry requirements for a selected academic programme
- Regular mock interview workshops to enable students to practice their skills before undertaking an actual university placement interview
- Assistance with facilitating a letter of recommendation for university applications for eligible students
- Special talks by invited speakers from overseas universities on succeeding in the university application process

INDUSTRY ATTACHMENT PROGRAMME

A pioneer addition to the INTI Pre-University programme, students are able to volunteer for internships with accredited partners and learn more about the working world in a safe, supervised manner.

PARENT/TEACHER CONSULTATION SESSIONS

To ensure students are progressing on the right path and caregivers are properly appraised of their child's progress, the INTI Pre-University course integrates regular parent-teacher meetings in week 8 or 9 of every semester so that both sides can highlight any concerns that they have.

Student performance is also regularly monitored with an early warning system set in place to help correct their course if they fall behind or encounter challenges in their studies. Students who require additional assistance can also consult with their lecturers for four hours per week. For those who need further help, INTI has also provisioned Peer Assisted Study Sessions (PASS) where senior students help to guide academically poor students in order to improve their performance.

EXTRA-CURRICULAR ACTIVITIES

Placement in the world's best universities requires that prospective candidates are excellent all-rounders with a holistic education that covers not only academic knowledge but soft skills as well. The INTI Pre-University programme prepares you for excellence by offering students a vast array of extra-curricular activities that help to develop the 4C's - Communication, Critical Thinking Skills, Collaboration and Creativity - all of which are required skills for success in higher education and later in life. The intake proactively organised several of the following activities:

FIELD TRIPS

An off-campus excursion that expands a student's horizons as well as their knowledge of a subject with direct hands-on experiences which are more impactful than purely academic class work alone. It is considered a critical aspect of the INTI Pre-University course.

Biology Field Trip to Seagrass Bed
Students learnt about quadrat sampling and the importance of seagrass bed in our ecosystem

Educational Visit to the Palace of Justice
Students visited the Palace of Justice, which houses the Malaysian Court of Appeal and Federal Court. The trip was aimed to enhance students' knowledge on the Malaysian Legal System

Study Trip to Nuclear Agency Malaysia
Students who visited the Nuclear Power Plant (MOSTI) were briefed on its facilities, primarily on contextualized nuclear power and the nuclear reaction research based in Malaysia

COMPETITIONS

INTI regularly organises competitions that encourage and bring out the best in students so that they strive to be the very best they can be.

General Electric Leaders of Tomorrow
A leadership programme where students compete for five positions as student ambassadors

IMU Science Discovery Challenge 2018
This science themed competition in Malaysia was organized to create greater awareness on Science amongst students and cultivate interest in health sciences careers

Kangaroo Mathematics Competition
The largest Mathematics competition in Malaysia with student participation of more than 40,000

HEAR WHAT OUR ALUMNI SAY

FIONNE LIM

Studied Cambridge A-levels
Pursuing Bachelor of Science in Economics

“ I chose INTI because it's a renowned college in Penang. INTI allowed me to combine both art and science subjects, which aided me in my decision-making process on whether to venture into the art or science stream for my undergraduate programme. My economics lecturer really inspired me. She often imparted us with knowledge beyond the prescribed syllabus and it instilled my interest in economics. Her constructive feedback on our work and essays prompted me to strive harder and to brush-up.

I feel blessed and satisfied with my results as it commensurates with the time and effort I have invested. Juggling between my priorities, given the time constraint, was a struggle. I helmed the position as the Secretary of Student Welfare in INTI's student government, and worked with the team to organise campus events such as Leadership camps, Talent Quest, Prom, etc. We looked after students' welfare and facilitated the process of voicing out on campus-related issues to the management.

I will be pursuing economics at the University of Warwick, UK. The relevance of economics in our daily lives allows me to keep up with unfolding world events, and helps me understand its implications. Besides that, I plan to venture into the financial-service industry as I believe that economics will equip me with the requisite knowledge, skills and qualifications.

I have my friends and family to thank for inspiring me to be the best version of myself. Their endless support and encouragement is what motivated me. I am a strong believer that time management is key, that it's important to always have a balance of everything, and prioritise the right thing at the right time, including studies, time with friends and family, extracurricular activities and leisure. My advice would be to have a goal, work hard for it, but to also not forget about having fun in the process.”

AU ZHE KHYE

Studied Cambridge A-levels
Pursuing Biomedical Engineering

“ I chose INTI International College Penang (IICP) because I saw the active student life there, and wanted to be a part of the student council (INTIMA) as well as various other activities. My involvement has trained me in almost every aspect of becoming more independent with a plethora of soft skills and tough experiences.

I was heavily involved in the student council (INTIMA) and I am currently a senior exco member of it. However, it is entirely on a voluntary basis. Engineering is my inspiration. I've always been fascinated with how everything works, how complicated systems and logistics come along to maximize efficiency. Hence, I am currently pursuing a Degree in Biomedical Engineering at King's College in London.

I plan on advancing to my Masters at either Imperial College or Cambridge because I believe Bioengineering is the next industry to undergo a big boom. To be successful, I think time management is incredibly important. I struggled sometimes due to not being able to focus, and found that truly understanding yourself can prevent that from happening. Have a clear goal of what you want to achieve, and plan thoroughly.”

AMINATH THUQA SHAREEF

Studied Foundation in Arts
Pursuing Bachelor of Mass Communication

“ My name is Aminath Thuqa Shareef, and I am from the Maldives.

INTI, with its appealing environment and advantageous learning system, was quick to persuade that this was the perfect university for me. At Foundation level, I had the opportunity to co-create multiple successful events which I am immensely proud of.

A common pattern with every accomplishment is that I always end up acquiring a new set of skills that is not only limited to the syllabus. This means that practical learning gave me a sneak peak to real-life work situations. It gives me the sense that in INTI, not only is my knowledge enriched, but that I am also growing as a person.

The whole learning process triggers a communal bond amongst students and we are constantly encouraged to work together.

The lecturers at INTI are truly amiable, quick to guide and diverse in their teaching styles. Even in a class full of local students, I was assured that I wasn't any different from the rest. The result was an even more comfortable learning environment.

After completing Foundation in Arts, I am now doing Bachelor of Mass Communication. I realise that everything I learnt in Foundation was a stepping stone. I can easily identify and relate theories, and expand the methods I used in Foundation to complete assignments faster.”

HOR TZE CHENG

Studied Foundation in Science
Pursuing Bachelor of Mass Communication

“ My foundation life in INTI has been a challenging and thrilling one. I like the fact that the lecturers here are helpful and approachable. Besides, there is a lot of interactions between lecturers and students during classes and laboratory practical. INTI offer students a wide range of social activities organized by INTIMA as well as clubs and societies. I was part of the INTIMA Service Cell where I get to meet some of my good friends from local and international countries.

I have learnt to be more responsible and self-dependent. At the same time, I was able to juggle between academic and social activities. In my opinion, life of a university student should not be just about studies but we should not be afraid of taking risks, accept challenges and try out something new every day. ”

LIM TZE MENG

Studied Foundation in Science
Pursuing Bachelor of Science (Hons) Physiotherapy,
INTI International University

“ My first semester in INTI was very exciting as I had to take up 2 subjects; Self-development Skills and General Studies. One of the component of these subjects was to complete a project. My most unforgettable experience was organizing a fund raising project; “Fun Fair Fiesta”. As a member of the project committee, I went through many challenges in organizing this event. I was able to learn skills I never knew I could such as time management, project planning, negotiation, social-networking as well as leadership.

As part of my foundation journey I was also an active committee and member of a few clubs and societies in INTI such as Badminton, Dodgeball, Frisbee and Green Knight Club. My participation in these clubs and societies has groomed me to be a better person; more independent, responsible and accountable.

I would like to thank my lecturers in INTI as they are very passionate in educating us. They often give us good advice and guidance throughout my studies in INTI. I am proud to be an INTIAN! ”

OOI JOO VERN

Studied Foundation in Science
Pursuing Mechanical Engineering

“ I chose to study at INTI because it is a reputable college, and has created many successful students. Studying at INTI gave me a great taste of university life thanks to the subjects I had as well as the help from my lecturers. All my lecturers at INTI were friendly and did well in guiding me towards a brighter future.

I managed to achieve a lot during my time at INTI. I participated in a number of swimming competitions such as Malaysia Open, SUKIPT, Selangor Age Group, in international competitions that were held in Australia, Singapore, Hong Kong and Thailand. I also took part in the glider competition held at INTI College Nilai and won the longest flight distance. Time management was a daily challenge for me, but I preserved and managed to balance my studies and sports. I was both shocked and proud of how well I did in college, and thanks to the support from my lecturers and peers.

I will pursue my study in Mechanical Engineering. I choose this course because I am good with numbers and love to solve problems. I also like hands-on work, so it's perfect for me. My advice to my fellow students would be to just try your best to understand the lectures in class. Ask questions if you do not understand. Do the tutorials and learn from it. My biggest inspiration, is my parents. They sacrificed so much for me and I just want to repay them with a brighter and happier future. ”

ANITA YEOH BALAKRISHNAN

Studied Foundation in Science
Pursuing Bachelor of Science (Hons) Physiotherapy,
INTI International University

“ I have chosen to study Foundation in Science at INTI because the lecturers are very knowledgeable and the classes are always engaging. After finishing my foundation studies, I pursue my dream to study Bachelor of Science (Hons) Physiotherapy at INTI. Studying in INTI is a learning curve for me which has helped me developed a strong extended family bond with all my friends in INTI. The relationship I have created with my lecturers and friends has helped me in many ways, for instance, helped me achieved better academic results, expanded good circle of international friends from other countries. At INTI, they encourage each student to excel in both academic and extra-curriculum. Therefore, being active in sports is another place where I am able to find my passion as well as expand my circle of friends. ”

KHOO YAN YING

Studied Cambridge A-levels
Pursuing Pharmacy Degree in University of Sunderland, UK

“ I chose INTI because it has an excellent reputation in terms of providing high quality teaching, having international collaborations with prestigious universities, and providing a vibrant and conducive learning environment. INTI prepares its students by focusing on self-development. Lecturers in INTI are outstanding, with Ms. Tan Bee Hooi as an example. She is dedicated, patient, friendly, and a humorous lecturer. Ms. Tan possesses vast knowledge in the Biology field and is always happy to share interesting facts during lessons. She has inspired me to keep learning and to one day be able to contribute back to society.

I was the President of INTI Diversity Toastmasters Club Penang. I attended Toastmasters meetings on Tuesdays where I learned useful public speaking skills. I also participated in a Humorous Speech contest at Club Level where I managed to get first placing, and joined Mock United Nations (MUN) organized by Tenby, in which participants discussed real world issues. I experienced some difficulties when attempting questions as it required high-order thinking skills. But thankfully, I was able to overcome them by doing past year questions and seeking help from my lecturers when I couldn't fully understand. I will be doing a Master of Pharmacy Degree as I have great interest in becoming a Pharmacist, playing my part in the healthcare team to improve medication adherence. I will be furthering my studies at the University of Sunderland, and I am thankful to have met my goals as they weren't easy to achieve.

Helen Keller is who I look up to. Despite being both blind and deaf, she didn't let it get in the way of success. She demonstrated passion and a positive attitude towards learning. Helen never gives up whenever faced with hurdles in life, and that's what inspires me so greatly. The influence of a good teacher can never be erased, and I believe that choosing INTI for your pre-university studies will greatly benefit you, based on the quality of education they have always provided. I also believe that good time management and self-discipline are key factors in achieving success.”

THIVYA DASS A/P PERUMAL DASS

Studied Foundation in Science
Pursuing Bachelor of Biotechnology (Hons), INTI International University

“ I chose to study at INTI because I liked the friendly environment and the helpful people. My counsellor, Miss Grace helped me choose Foundation in Science by patiently elaborating on the courses offered at INTI International College Subang. Thanks to her, I'm able to do well in my studies. Studying here helped me become more mature, more independent and helped sharpen my soft skills. I also now make new friends easier, thanks to improved communication skills.

I made many fond memories at INTI. For a physics project during my first semester, my friends and I created a water alarm and in my third semester, we participated in the World of Science – Robot Event for Creative Thinking Skills in 2018. We also joined a Scrabble competition held in the college. Individually, I participated in the 4th IMU Science Discovery Challenge 2018 at a national level, and made it onto the Dean's list during my first and third semester.

My first term biology lecturer, Dr. Ramani, made a huge impact on me. She cared deeply about her students, and her teaching methods enabled me to learn with more ease. She was always ready to help whenever I couldn't understand a topic and inspired me to be a great lecturer in the future. I thank her immensely. My biggest inspirations in life are success and my parents. My hunger for success motivates me to work hard to achieve the things I want in life, and my parents inspire me with how hard they work to provide for me. They inspire me to always give my best in my studies as there is nothing better than making them proud.

As a student, I experienced time management issues as I loved to procrastinate. I achieved success because of hard work, and never gave up easily because as the saying goes, 'Rome wasn't built in a day.' Also, I made Google my best friend. Whenever I had difficulties with my assignments, online videos helped. My advice to fellow students would be to know that it's fine to enjoy yourself in college, but it's important to work hard as well. Never be shy to ask questions or help from others because if you want something, you have to work for it.”

RECOGNISED AND ACCEPTED, WORLDWIDE

Since 1986, our Pre-University programmes have enabled our students to enter the following prestigious universities.

PASSION TAKES YOU PLACES

AT INTI, WE HELP YOU SOAR! EMBRACE. EXPLORE. EXCITE.

INTI International University & Colleges isn't just about academic programs alone. Across all of its six campuses in Malaysia, students are encouraged to embrace their passion and enhance their skills in a meaningful way. With a range of clubs and societies that offer a host of activities and interests, along with the opportunity to participate in study trips around the globe, INTI provides a nurturing environment that truly lets you spread your wings and expand your horizons.

Beyond that, INTI is a place where you can form bonds and friendships that will last you for a lifetime, while acquiring the soft skills that will hold you in good stead wherever you go in life. This pursuit of passion and camaraderie among our students has driven them to greater heights with a host of self-initiated projects that have taken them across the globe.

"I would not have succeeded without a dynamic and committed team with me, along with guidance from dedicated Lions and INTI staff. My experiences have molded me into a stronger leader and tremendously enhanced my soft skills. My fondest memory with the Leo Club was at the Leo Forum in Penang where I met fellow Leos from all over the country and had the honour of receiving several awards and giving my last speech as president."

GRACE LIM YEN-TZER
President,
Leo Club of INTI International College Subang

"When I first joined the Japanese Culture Anime Club (JCAC), I enjoyed how friendly and open everyone was. What I am most grateful for is how the club has taught me to be more outspoken and assertive. My most memorable moment was when the JCAC jointly held a gaming event in 2015. The camaraderie and the experience of working together as a team to organise and participate in the event were unforgettable."

RINA TAN
Assistant Event Planner,
Japanese Culture Anime Club (JCAC)

"Being a part of the club allowed me to unleash my potential by helping me explore my skills and capabilities beyond my comfort zone, and enabled me to establish a solid foundation with like-minded entrepreneurs. It also provided me with many opportunities to emcee numerous tech industry related forums and discussions which in turn helped me improve my organisational and time management skills."

JOSHUA MATHEWS
Technopreneur Club

RUBICON INTERNATIONAL BUSINESS CASE COMPETITION 2017

Location: Germany
INTI students won third place, ahead of teams from Germany at the Rubicon International Business Case Competition 2017 themed 'The Internet of Things (IOT)'. Rubicon encourages students to participate in this stimulating case study competition to develop critical thinking skills, where they are required to analyze and present possible solutions to a panel of judges. These cases revolve mostly around economic issues faced by various countries.

LAUREATE AWARD FOR EXCELLENCE IN ROBOTICS ENGINEERING COMPETITION 2017

Location: Brazil
Finding ingenious ways to automate for a greener environment, four mechanical engineering students from INTI International University have developed a robot with built-in Artificial Intelligence (AI) to keep recreational parks clean, by picking up and sorting out garbage for recycling. The second year students who competed at the Laureate Award for Excellence in Robotics Engineering held at Universidade Salvadore (UNIFACS) in Brazil was elated when they successfully clinched the 1st runner-up spot in the competition.

CODE-A-THON COMPETITION 2017

Location: Singapore
A team of five students from the Bachelor of Science in Computer Science / Computing degree at INTI International College Penang recently participated in a Code-a-Thon challenge organised by Code for Asia Singapore, and successfully won the 'Most Socially Impactful Award' under the university category. The winning team was cordially invited to the Code-a-Thon closing summit and prize-giving ceremony at Google's Asia Pacific headquarters in Singapore to receive their award.

COVENTRY UNIVERSITY STUDY TRIP 2018

Location: UK
The School of Engineering and Technology in INTI International College Penang recently organized a study trip to Coventry University, UK to provide students with the opportunity to interact with foreign students as well as broaden their knowledge of the environment in the real world industry. Students also gained exposure from various industry field visits and benefited from the career-focused itinerary.

STUDY TOUR TO CHENGDU 2018

Location: China
Students from the Faculty of Business, Communication and Law (FOBCAL) arranged a study trip to China as part of their initiative to learn more about the Chinese culture. The students visited many prominent national landmarks including the Chengdu Aeronautic Vocational & Technical College and Tencent Group. This tour played a significant role in their study experience as the activities done allowed them to appreciate the culture and to develop their analytical skills based on a global perspective.

STUDY TRIP TO INDIA 2018

Location: India
A study tour to The Association of People with Disability (APD) in India on 25 June 2018 was organized by INTI International University's (INTI) Physiotherapy department as part of the programme's hands-on clinical skills training abroad. The Physiotherapy programme helps students to formulate physiotherapeutic exercises and treatments for patients with physical disabilities, by providing learning sessions from current global industry experts and their ongoing initiatives.

UNIVERSITY OF WOLLONGONG STUDY TOUR 2018

Location: Australia
Twenty-six students from Centre for University of Wollongong Programs, INTI International College Subang visited University of Wollongong (UOW), Sydney on September 2018. Students gained valuable experiences during the one-week trip where they get to appreciate the innovative ideations from UOW Innovation campus. The tour allowed students to develop cross-cultural communication skills and learn to deal with local industry leaders, expatriates and homestay-families through cultural exchange activities. They also visited various business and government organisations.

EARTHQUAKE COMPETITION: 2018 IDEERS

Location: Taiwan
A group of Engineering students from INTI International University has won various awards at the 2018 IDEERS (Introducing and Demonstrating Earthquake Engineering Research in Schools), an international engineering competition held in Taiwan. The competition was jointly organised by several agencies including the Taiwan National Center for Research on Earthquake Engineering and the Asia-Pacific Network of Centers for Earthquake Engineering Research.

A MIND IS A TERRIBLE THING TO LOSE

HEALTHY MIND. HEALTHY BODY. WE'RE HERE TO HELP OUR STUDENTS ACHIEVE BOTH.

It's a fact, that college is not a walk in the park. The transition from high school to college is a significant change in one's lifestyle and being away from friends and family in a new and unfamiliar environment can be daunting. For many students, this transition, while exciting, can be tough to cope with.

According to the Ministry of Health, Malaysia, in 2016 alone, one in five Malaysian students suffered from mental health problems. What's worse, a prolonged state of mental health issues can result in permanent consequences, including schizophrenia, depression, insomnia and ultimately suicidal thoughts. According to the World Health Organization, suicide was the second leading cause of death among individuals aged between 15-29 years old, with a suicide attempt occurring every three seconds.

AS A STUDENT AT INTI, YOU'RE NEVER ALONE. WE'RE HERE FOR YOU.

To help you adapt to the demands of college life, INTI has developed the **MESA PROGRAMME**. Developed by INTI's team of experienced student counsellors through research in established student counselling methodologies, MESA serves as a bedrock for students throughout their journey at INTI, helping students to excel Mentally, Emotionally, Socially and Academically (MESA).

Providing a support group and source for counselling and guidance, MESA helps new and current students to cope with the demands of academic life and provides various platforms for them to develop into well-adjusted, successful individuals in life. Here's how various aspects of the INTI MESA Programme contribute to the mental health and happiness of our students:

M - MENTAL(LY)

Adjusting to the rigours of college life can be a daunting task. This is on top of potential family, health and relationship problems which may be more than what a student can bear. INTI's professionally trained team of student counsellors are able to lend a friendly ear and a helping hand through free, professional student counselling in a confident and discreet manner. Students are also exposed to workshops that highlight pressing mental health issues such as recognising and addressing the risks of suicide, identifying depression, ways of combating stress and more.

E - EMOTIONAL(LY)

Mental health is but one component to achieving a well-balanced and healthy lifestyle. Emotionally healthy people are able to cope with the challenges that life throws at them and have the ability to establish and maintain healthy social ties with those around them. To avoid feelings of isolation or alienation, INTI assigns a senior student mentor to new students who guide and help them to adjust to academic life. Students can also participate in group counselling sessions to understand the dynamics and nuances of managing relationships and learn to cope with life's challenges.

S - SOCIAL(LY)

INTI offers robust social programs across all its campuses that engage students in a positive and meaningful way. At INTI there are a rich array of clubs, social networks and activities - many of which are proactively initiated by fellow students - that promote social interaction, aid in improving soft skills and encourage students to contribute to their communities.

A - ACADEMICAL(LY)

The demanding pace of higher education requires students to rapidly master a host of technical skills and new ways of learning to succeed. With the integration of the Blackboard Learning Management system into INTI's first year experience programs, students gain a bird's eye view of their progress and can easily identify areas for improvement with the help of their lecturers and academic staff. These are also supplemented with regular workshops that help acclimatise students to the rapid pace of learning and usage of the Blackboard system.

MEET SOME OF INTI'S COUNSELLING TEAM. WE'RE HERE FOR YOU.

All INTI campuses have accredited and professionally trained counsellors who are available for consultation and counselling services.

With a Master of Counselling from the University of Malaya and a degree in Science and Education (Guidance and Counselling) from University Technology Malaysia, Siow Yen has extensive experience in dealing with students enduring relationship issues, depression, addiction and more.

LIM SIOW YEN
Student Counsellor

With M. Edu in Guidance and Counselling from the National University of Malaysia, Ker Shin has a friendly smile and a kind word for everyone she meets and is a familiar face at INTI. She has extensive experience in counselling students on life issues and also conducts regular workshops for personal management and development.

TEOW KER SHIN
Student Counsellor

FOUNDATION IN DESIGN

The Foundation in Design programme offers a broad-based scope for exploration and experimentation that will enable students to become independent thinkers, creators or designers. Students are exposed to topics and projects which will allow them to become creative thinkers and find practical applications that can be translated into working ideas and designs.

The programme also enables students to develop a range of practical skills and fundamental knowledge in relation to art & design, preparing them for smooth progress to a design degree of their choice.

Highlights

- Pathway to a quality UK Design Degree offered at INTI
- The curriculum covers broad theoretical and practical design skills
- Teaching and learning is supported by experienced lecturers, ensuring a smooth progression to degree studies
- Specialist lecturers who are also design professionals
- Experiential and innovative learning via Project-based Learning
- The programme and curriculum emphasise multi-cultural perspectives
- Design-driven learning environment with state-of-the-art facilities

Programme structure

- 3D Design
- Critical Studies
- Design Communication Skills 1
- Design Communication Skills 2
- Design Theories to Practices
- Design Project
- English Language Skills 1
- English Language Skills 2
- General Studies
- History of Art & Design
- Portfolio Design
- Self-Development Skills
- Skills for Creative Thinking
